# The Designer Series

A beautiful home deserves a beautiful and distinctive "Grand Entrance". It sets the tone for the entire house and establishes a feeling of warmth, style and elegance.

The average Grand Entrance is 3' wide by 6'8" high, but consumer interest currently is strong in doors that measure 8' high. Other door sizes (42" or wider) are also available. The Grand Entrance might be composed of one or two doors, sidelites, and a decorative glass above the door called a transom.

The *Designer Series* has triple glazed insulated glass panels that permanently seal the beveled glass panel inside of two sheets of tempered safety glass. This design is energy efficient, improves security, and helps protect the beveled glass panel from possible breakage.

The *Contemporary*, *Traditional*, *Classic* and *Artistic* Grand Entrances are fully beveled clear glass designs with patina caming. The *Classic* and *Artistic* are also available in obscure glue chip beveled glass accent. The elegant *Atlantis* has a combination of clear bevels and waterglass accents with patina caming.
